Job Role	Plumbing Supervisor	
Role Description	Responsible for for supervising, coordinating and scheduling the activities of plumbers and other staffs.	
NVEQF/NVQF level	6	
Minimum Educational Qualifications*	12 <sup>th</sup> / Diploma	
Maximum Educational Qualifications*	N.A.	
Training (Suggested but not mandatory)	On-the-job training.	
Experience	In lieu of minimum qualification the employee has worked as a general plumber for minimum 6 years.	
Applicable National Occupational Standards (NOS)	<ol> <li>Compulsory:         <ol> <li>PSC/ N 0101 (Installation of basic sanitary fixtures, fittings, related piping and accessories)</li> <li>PSC/ N 0107 (Resource management)</li> <li>PSC/ N 0105 (Inspection and quality check of basic plumbing systems)</li> </ol> </li> <li>PSC/ N 0119 (Review and communicate designs and plans related to plumbing work)</li> <li>PSC/ N 0108 (Coordinating with the senior and other working team)</li> <li>PSC/ N 0109 (Maintain a healthy, safe and secure working environment)</li> <li>Optional:</li> <li>N.A.</li> </ol>	
Performance Criteria	As described in the relevant OS units	
	2	

Keywords /Terms	Description
Sector	Sector is a conglomeration of different business operations having similar businesses and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/related set of functions in an industry.
Function	Function is an activity necessary for achieving the key purpose of the sector, occupation, or area of work, which can be carried out by a person or a group of persons. Functions are identified through functional analysis and form the basis of OS.
Job Role	Job role defines a unique set of functions that together form a unique employment opportunity in an organization.
OS	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the knowledge and understanding they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria	Performance Criteria are statements that together specify the standard of performance required when carrying out a task.
NOS	NOS are Occupational Standards which apply uniquely in the Indian context.
Qualifications Pack Code	Qualifications Pack Code is a unique reference code that identifies a qualifications pack.
Qualifications Pack	Qualifications Pack comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A Qualifications Pack is assigned a unique qualification pack code.
Unit Code	Unit Code is a unique identifier for an Occupational Standard , which is denoted by an 'N'.
Unit Title	Unit Title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Knowledge and Understanding	Knowledge and Understanding are statements which together specify the technical, generic, professional and organizational specific knowledge that an individual needs in order to perform to the required standard.
Organizational Context	Organizational Context includes the way the organization is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical Knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills or Generic Skills	Core Skills or Generic Skills are a group of skills that are key to learning and working in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.

#### **Overview**

This unit is about installation of pipes and sanitary fixtures in housing, commercial and institutional setups.

Unit Code	PSC/N0101
Unit Title (Task)	Installation of basic sanitary fixtures, fittings, related piping and accessories
Description	This OS unit is about installation of pipes and sanitary fixtures in housing, commercial
	and institutional setups
Scope	This unit/task covers the following:
	Pre-installation     pre-installation related activities involving understanding of the task, material preparation, taking measurements and marking the positions
	Installation  • installation related activities of pipes and sanitary fixtures  Post-installation  • basic quality check of the installed fittings and fixtures  • testing, commissioning and handover activities

#### Performance Criteria(PC) w.r.t. the Scope

Element	Performance Criteria	
Pre-installation	competent, the user/individual on the job must be able to: understand the task to be done assemble pipe sections, tubing and fittings, using couplings, clamps, screws, bolts, caulking tools, or cutting, threading and joining equipment establish the sequence of pipe installations plan installation around obstructions such as electrical wiring, etc. locate and mark the position of pipe installations, connections, passage holes, and fixtures in structures, using measuring instruments such as rulers and levels	
Installation	<ul> <li>PC6. cut openings in structures to accommodate pipes and pipe fittings, using hand and power tools (if required)</li> <li>PC7. measure, cut, thread, and bend pipe to required angle, using hand and power tools or equipment such as cutting, threading and bending equipment</li> <li>PC8. hang steel supports from ceiling joists to hold pipes in place (if required)</li> <li>PC9. install pipe assemblies, fittings, valves, appliances such as dishwashers and water heaters, and fixtures such as sinks and toilets, using hand and power tools</li> </ul>	
Productivity &	PC10. test the joints and fixtures for proper functioning	
Quality of output	PC11. clear the work area and waste disposal	

Kn	Knowledge and Understanding (K)				
A.	Organizational	The user/individual on the job needs to know and understand:			
	Context	KA1. company's policies on: quality and delivery standards, safety and hazards,			
		integrity, dress code, etc.			
		KA2. importance of the individual's role in the work flow			
		KA3. risk and impact of not following defined procedures/work instructions			
		KA4. how to handover/ takeover of the equipment / work area as per the			
		instructions			
В.	Technical	The user/individual on the job needs to know and understand:			
	Knowledge	KB1. different types of materials (CI/GI/PVC pipes, etc.), basic sanitary fittings			
		(valves, clamps, elbows, etc.) and fixtures (showers, taps, basins, etc.)			
		KB2. techniques related to cutting, bending and joining of fittings and fixtures			
		KB3. various types of defects such as leakages, improper alignment, etc.			
		KB4. basic plumbing terminology			
		KB5. relevant hand and power tools such as wrenches, plier, screwdriver, power			
		drill, pipe cutter, crimping tool, pipe bender, threading tool, hacksaw, metal			
		file,, etc.			
		KB6. units of measurement			
		KB7. material disposal procedure, importance of appropriate disposal of material

#### **Overview**

This unit is about management of resources in terms of manpower, material and tools during execution of a plumbing assignment/task.

Unit Code	PSC/N0107		
Unit Title			
(Task)	Resource management (Manpower, Material and Tools)		
Description	This OS unit is about management of resources in terms of manpower, material and		
	tools during execution of a plumbing assignment/task		
Scope	This unit/task covers the following:		
	Manpower management		
	workforce planning and work assignment related activities		
	Material and tools management		
	planning and maintaining inventory of material required for the task		
	maintenance and management of tools and equipments		
	201 (S. 201 (S		
Performance Criteria(F	PC) w.r.t. the Scope		
Element	Performance Criteria		
Manpower	To be competent, the user/individual on the job must be able to:		
management	PC1. schedule assign day to day activities blumbers		
	PC2. overall supervision of plumbing work at the site		
	C3. management of manpower in cases of change of schedule/plan		
Material & tools	PC4. keeping track of material usage		
management	PC5. aid in obtaining materials necessary to complete the job		
	PC6. management of plumbing tools and equipment		
	PC7. management of material/tools in cases of change of schedule/plan		
	PC8. maintain plumbing tools and equipment		
Knowledge and Under	standing (K)		
A. Organizational	the user/individual on the job needs to know and understand:		
Context	KA1. impact of various resources on cost, quality, productivity, delivery and safety		
	KA2. material disposal procedure, importance of appropriate disposal of material		
	and implications of not following the material disposal procedure		
	KA3. risk and impact of not following defined procedures/work instructions		
	KA4. handover/ takeover of the equipment / work area as per requirement		
	KA5. skills and expertise of the working team		
	KA6. procedure to put requisition for materials and supplies		
	KA7. procedure of providing adequate feedback about working team		

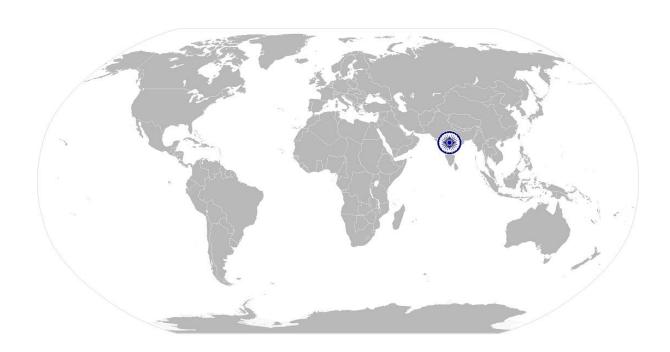

The user/individual on the job needs to know and understand:   KB1. different types of materials (c/je//pvc pipes, etc.), basic sanitary fittings (valves, clamps, elbows, etc.) and fixtures (showers, taps, basins, etc.)   KB2. techniques related to cutting, bending and joining of fittings and fixtures     KB3. basic plumbing terminology     KB4. relevant hand and power tools such as wrenches, plier, screwdriver, power drill, pipe cutter, crimping tool, pipe bender, threading tool, hacksaw, metal file, etc.     KB5. units of measurement     KB6. material disposal procedure, importance of appropriate disposal of material     Skills (s)     A. Core Skills     Communication skills     The user/individual on the job needs to know and understand how to:     SA1. communicate in Hindi'/ regional language     SA2. instruct workers and explain the task to be performed     Administrative skills     SA3. put requisition for more resources interms of manpower, material and/or tools     SA4. re-allocate resources in case of change of plan or emergency situations     SA5. give feedback and convey the ways of improvement     SA6. resolve work problems and recommend measures to improve productivity     Resource management skills     The user/individual on the job needs to know and understand how to:     SB1. estimate resources required for a work/task     SB2. plan and maintain an optimum inventory of resources for on-going work     SB4. use a variety of measuring devices     SB5. identify tools, equipment and procedures required for installing piping     fixtures and fittings     SB7. plan the work process in such a way which improves quality with minimal resource utilization     SB8. apply learning of past errors     SB9. improve productivity and increase efficiency based on the past experience					
(valves, clamps, elbows, etc.) and fixtures (showers, taps, basins, etc.)  KB2. techniques related to cutting, bending and joining of fittings and fixtures  KB3. basic plumbing terminology  KB4. relevant hand and power tools such as wrenches, plier, screwdriver, power drill, pipe cutter, crimping tool, pipe bender, threading tool, hacksaw, metal file, etc.  KB5. units of measurement  KB6. material disposal procedure, importance of appropriate disposal of material  Skills (S)  A. Core Skills/ Generic Skills  The user/individual on the job. needs to know and understand how to:  SA1. communicate in Hindi / regional language  SA2. instruct workers and explain the task to be performed  Administrative skills  SA3. put requisition for more resources in terms of manpower, material and/or tools  SA4. re-allocate resources in case of change of plan or emergency situations  SA5. give feedback and convey the ways of improvement  SA6. resolve work problems and recommend measures to improve productivity  Resource management skills  The user/individual on the job needs to know and understand how to:  SB1. estimate resources required for a work/task  SB2. plan and maintain an optimum inventory of resources for on-going work  SB3. determine the accuracy and thoroughness of work  SB4. use a variety of measuring devices  SB5. identify tools, equipment and procedures required for installing piping fixtures and fittings  SB6. operate, maintain and repair tools  Reflective thinking  SB7. plan the work process in such a way which improves quality with minimal resource utilization  SB8. apply learning of past errors  SB9. improve productivity and increase efficiency based on the past experience	B.	Technical	The user/individual on the job needs to know and understand:		
KB2. techniques related to cutting, bending and joining of fittings and fixtures kB3. basic plumbing terminology KB4. relevant hand and power tools such as wrenches, plier, screwdriver, power drill, pipe cutter, crimping tool, pipe bender, threading tool, hacksaw, metal file, etc. KB5. units of measurement KB6. material disposal procedure, importance of appropriate disposal of material  Skills (S)  A. Core Skills/ Generic Skills  The user/individual on the job. needs to know and understand how to: SA1. communicate in Hindi/ regional language SA2. instruct workers and explain the task to be performed  Administrative skills  SA3. put requisition for more resources in teams of manpower, material and/or tools  SA4. re-allocate resources in case of change of plan or emergency situations SA5. give feedback and convey the ways of improvement SA6. resolve work problems and recommend measures to improve productivity  B. Professional Skills  The user/individual on the job needs to know and understand how to: SB1. estimate resources required for a work/task SB2. plan and maintain an optimum inventory of resources for on-going work determine the accuracy and thoroughness of work SB4. use a variety of measuring devices SB5. identify tools, equipment and procedures required for installing piping fixtures and fittings SB6. operate, maintain and repair tools  Reflective thinking SB7. plan the work process in such a way which improves quality with minimal resource utilization SB8. apply learning of past errors SB9. improve productivity and increase efficiency based on the past experience		Knowledge	KB1. different types of materials (ci/gi/pvc pipes, etc.), basic sanitary fittings		
KB3. basic plumbing terminology KB4. relevant hand and power tools such as wrenches, plier, screwdriver, power drill, pipe cutter, crimping tool, pipe bender, threading tool, hacksaw, metal file, etc. KB5. units of measurement KB6. material disposal procedure, importance of appropriate disposal of material  Skills (S)  A. Core Skills/ Generic Skills  Communication skills The user/individual on the job needs to know and understand how to: SA1. communicate in Hindi / regional language SA2. instruct workers and explain the task to be performed  Administrative skills  SA3. put requisition for more resources in terms of manpower, material and/or tools SA4. re-allocate resources in case of change of plan or emergency situations SA5. give feedback and convey the ways of improvement SA6. resolve work problems and recommend measures to improve productivity  Resource management skills  The user/individual on the job needs to know and understand how to: SB1. estimate resources required for a work/task SB2. plan and maintain an optimum inventory of resources for on-going work SB3. determine the accuracy and thoroughness of work SB4. use a variety of measuring devices SB5. identify tools, equipment and procedures required for installing piping fixtures and fittings SB6. operate, maintain and repair tools  Reflective thinking SB7. plan the work process in such a way which improves quality with minimal resource utilization SB8. apply learning of past errors SB9. improve productivity and increase efficiency based on the past experience			(valves, clamps, elbows, etc.) and fixtures (showers, taps, basins, etc.)		
KB4. relevant hand and power tools such as wrenches, plier, screwdriver, power drill, pipe cutter, crimping tool, pipe bender, threading tool, hacksaw, metal file, etc.  KB5. units of measurement KB6. material disposal procedure, importance of appropriate disposal of material  Skills (s)  A. #### **Overview**

This unit is about inspection and quality check of basic plumbing systems in housing, commercial and institutional setups.

Unit Code	PSC/N0105		
Unit Title (Task)	Inspection and quality check of basic plumbing systems		
Description	This OS unit is about inspection and quality check of basic plumbing systems in housing, commercial and institutional setups.		
Scope	This unit/task covers the following:  Inspection  It covers inspection of all the systems for required functioning  Quality check  Ensure quality in all installations and connections		
Performance Criteria(P	C) w.r.t. the Scope		
Element	Performance Criteria		
Preparatory site inspection  Work-in-progress and completion related inspection	To be competent, the user/individual on the job must be able to:  PC1. access completion of required work  PC2. verify field measurements as per drawings / site requirements  PC3. assure availability and quality of required materials  PC4. identify any non-conformances to the requirements for the work/task to begin  PC5. identify potential problems  PC6. keep a track of adequate and proper usage of material  PC7. ensure fittings and fixtures are installed as per the layout  PC8. Inspect all the systems for required functioning		
	PC9. ensure quality in all installations and connections in terms of proper alignment, water tight joints (pressure and flow/smoke tests), access area for cleaning of fixtures, etc.		
Knowledge and Unders			
C. Organizational Context	<ul> <li>The user/individual on the job needs to know and understand:</li> <li>KA5. company's policies on: quality and delivery standards, safety and hazards, integrity, dress code, etc.</li> <li>KA6. risk and impact of not following defined procedures/work instructions</li> <li>KA7. general inspection procedures</li> </ul>		
D. Technical Knowledge	<ul> <li>KB1. different types of materials (CI/GI/PVC pipes, etc.), basic sanitary fittings (valves, clamps, elbows, etc.) and fixtures (showers, taps, basins, etc.)</li> <li>KB2. techniques related to cutting, bending and joining of fittings and fixtures</li> <li>KB3. various types of defects such as leakages, improper alignment, etc.</li> </ul>		

		KB4. procedure for conducting pressure and flow/smoke tests		
KB5. basic plumbing termin		KB5. basic plumbing terminology		
		KB6. units of measurement		
		KB7. material disposal procedure, importance of appropriate disposal of material		
Ski	ills (S)			
A.	Core Skills/	Communication skills		
	Generic Skills	The user/individual on the job needs to know and understand how to:		
		SA1. communicate in Hindi / regional language		
		SA2. instruct and enquire the workers related to quality check		
		Measurement/positioning skills		
		SA3. perform simple mathematical calculations		
		SA4. measure and mark positions as per instructions		
B.	<b>Professional Skills</b>	Critical thinking and decision making		
		The user/individual on the job needs to know and understand how to:		
		SB1. spot signs of deviation from quality and communicate to the reporting		
		authority		
		SB2. learn from past errors		
		Quality check		
		SB3. ensure quality at work-in-progress stage		
		SB4. check for quality parameters in the installations and connections of various		
		fittings and fixtures

#### **Overview**

This unit is about reviewing designs and plans related to plumbing work and communicating its application on the work site.

Unit Code	PSC/N0119
Unit Title (Task)	Review and communicate designs and plans related to plumbing work
Description	This OS unit is about reviewing designs and plans related to plumbing work and communicating its application on the work site
Scope	This unit/task covers the following:
	Review and communicate designs and plans  • study of designs and plans in context of specifications of the site and communicate the work plan to work supervisors of the respective teams
	Compliance
	continually ensure compliance of work in progress and completed work in accordance with the specified designs and plans
Performance Criteria(P	C) w.r.t. the Scope
Element	Performance Criteria
Review and	To be competent, the user/individual on the job must be able to:
communicate designs	PC1. understand the prepared design
and plan	PC2. checking plans, drawings and quantities for accuracy of calculations
	PC3. validate the designs, ensuring that designs meet the site's requirement PC4. communicate and explain the final designs and suitable work plan to
	PC4. communicate and explain the final designs and suitable work plan to respective plumbing team supervisors
Compliance	PC5. ensure designs are applied correctly during work in progress
Compilation	PC6. do a quality check of all the completed work to ensure compliance with the
	design
	PC7. ensure that the communicated execution plan is followed by all working
	teams
Knowledge and Unders	standing (K)
A. Organizational	The user/individual on the job needs to know and understand:
Context	KA1. company's policies on: quality and delivery standards, safety and hazards,
	integrity, dress code, etc.
	KA2. importance of review of designs and plans
	KA3. risk and impact of not following defined procedures/work plans
	KA4. how to obtain designs and plans
B. Technical	The user/individual on the job needs to know and understand:
Knowledge	KB1. basic plumbing principles related to design, planning and execution
	KB2. relevant designing and planning software such as AutoCAD, MS Office, etc.
	KB3. design and plumbing terminologies

		KB4. units of measurements	
		KB5. basic runtime errors and their resolution ensuring minimal deviation from the	
design/plan		design/plan	
		KB6. how to calculate material requirements as per drawing	
Ski	lls (S)		
A.	Core Skills/	Communication and reading skills	
	Generic Skills	The user/individual on the job needs to know and understand how to:	
		SA1. communicate in Hindi, English and/or regional language	
		SA2. read designs and plans	
		Estimation skills	
		SA3. perform mathematical calculations	
	SA4. basic quantity and time estimations as per the design/plan		
В.	<b>Professional Skills</b>	Critical thinking and decision making	
		The user/individual on the job needs to know and understand how to:	
SI		SB1. spot signs of deviation from design/plan and take appropriate action	
SB2. learn f		SB2. learn from past errors	
		Quality check	
		SB3. ensure quality at work-in-progress stage according to design requirements	
SB4		SB4. check for quality parameters in the installed plumbing systems	
Co-ordination and supervision		Co-ordination and supervision	
SB5. allocate work to supervisors as required			
		SB6. communicate instructions and requirements correctly	
		SB7. co-ordinate with co-workers, sub-ordinates and seniors for design/plan	
		related compliance

### **Overview**

This unit is about team work and level of communication with colleagues or clients. It determines the ability to work as a team member, share work and multi-task in order to achieve the deliverables on schedule.

Unit Code	PSC/N0108		
Unit Title	Coordinating with the senior and other working team		
(Task)			
Description	S OS unit is about communicating with colleagues and seniors in order to achieve both and hazard free work flow		
Scope	This unit/task covers the following:		
	Interact with senior		
	receive work instructions, discuss task status and receive feedback		
	, and the second		
	Interact with colleagues within and outside the team		
	<ul> <li>communicate and discuss work flow, problems faced, possible solutions and</li> </ul>		
	pass on the learning within and outside the team		
Performance Criteria(P	C) w.r.t. the Scope		
Element	Performance Criteria		
Interaction with	To be competent, the user/individual on the job must be able to:		
senior	PC1. receive work instructions and raw materials from reporting senior		
	PC2. communicate to reporting senior about task status, repairs and maintenance		
	of tools and equipment as required		
	PC3. communicate any potential hazards and expected process disruptions		
	PC4. handover completed task to reporting senior		
	PC5. receive feedback from reporting senior		
	PC6. report any anticipated reasons for delays		
Interact with PC7. work as a team with colleagues and share work as per the work load			
colleagues within and	PC8. work with colleagues of other teams		
outside the team	PC9. communicate and discuss work flow related difficulties in order to find		
	solution with mutual agreement		
	PC10. taking instructions from the reporting senior		
PC11. report problem/incident etc.			
	PC12. put team over individual goals PC13. resolve conflicts		
Knowledge and Unders	standing (K)		
A. Organizational	The user/individual on the job needs to know and understand:		
Context	KA1. company's policies on: preferred language of communication, quality delivery		
	standards and personnel management		
	KA2. reporting structure		

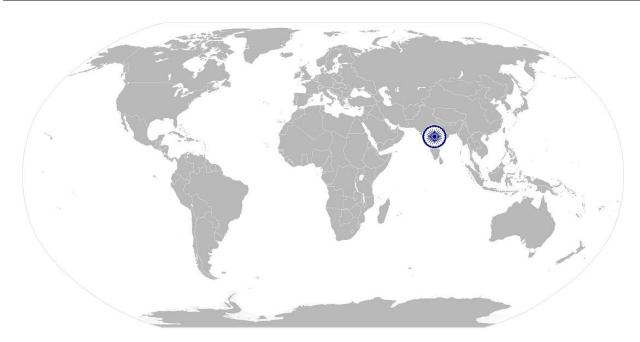

В.	Technical	The user/individual on the job needs to know and understand:			
	Knowledge	KB1. effective ways of communication			
		KB2. building team co-ordination			
Ski	lls (S)				
A.	Core Skills/	Communication skills			
	Generic Skills	The user/individual on the job needs to know and understand how to:			
		SA1. communicate in Hindi / regional language			
		Teamwork			
		SA2. share work load as required			
		SA3. accept and interpret instructions and requirements correctly			
		SA4. co-ordinate with co-workers and sub-ordinates			
В.	<b>Professional Skills</b>	Decision making			
		The user/individual on the job needs to know and understand:			
		SB1. how to spot and communicate potential areas of disruptions to work process			
		and report the same			
		SB2. when to report to senior and when to deal with a colleague individually,			
		depending on the type of concern			
		Reflective thinking			
		SB3. improve work processes by interacting with others and adopting best practices			
	100.	practices

PSC/N0109 Maintain a healthy, safe and secure working environment

# National Occupational Standard

#### **Overview**

This unit is about being aware of, communicating and taking steps towards minimizing potential hazards and dangers of accidents on the job and maintaining occupational health and safety.

# NOS National Occupational Standards

#### PSC/N0109 Maintain a healthy, safe and secure working environment

Unit Code	PSC/N0109		
Unit Title (Task)	Maintain a healthy, safe and secure working environment		
Description	This OS unit is about monitoring your working environment and making sure it meets requirements for health and safety		
Scope	This unit/task covers the following:		
	Communicate to reporting senior about		
	process flow improvements that can reduce anticipated or repetitive hazards		
	mishandling of tools and equipment		
	<ul> <li>electrical or any other problem at the construction site that could result in accident</li> </ul>		
Performance Criteria(P	PC) w.r.t. the Scope		
Element	Performance Criteria		
Communicating	To be competent, the user/individual on the job must be able to:		
potential accident	PC1. to avoid accidents related to use of sharp tools and equipment		
points	PC2. attend and actively participate in the health and safety campaigns orga		
	by the company or any other authority		
Using safety gear and PC3. use or wear safety gear (helmet, gloves, goggles, safety shoes, ear p			
following healthy practices	as per the rules of the company PC4. attend fire drills or any other safety drills organized by the company or any		
practices	other authority		
	PC5. learn first-aid procedure		
	PC6. use insect repellents and safe drinking water		
	PC7. use site toilets and follow other hygienic practices		
	PC8. understand the evacuation and emergency procedures		
Knowledge and Unders	standing (K)		
A. Organizational	The user/individual on the job needs to know and understand:		
Context	KA1. company's policy on: safety and hazards and personnel management		
	KA2. reporting structure		
B. Technical	The user/individual on the job needs to know and understand:		
Knowledge	KB1. how to use tools and equipment without suffering any physical harm		
	KB2. first-aid procedure		
	KB3. diseases caused due use of unsafe water, biting of insects and following		
	unhygienic practices		
	KB4. evacuation and emergency procedures
